## **2. Summary of the Industry (*Source: CRISIL Report*)**

India's professionally managed investment management industry is primarily driven by three segments: mutual funds, Portfolio Management Services ("PMS"), and Alternative Investment Funds ("AIFs").

The Indian mutual fund industry has witnessed significant growth, with industry quarterly average AUM ("QAAUM") increasing at an 18.4% CAGR from Fiscal 2019 to Fiscal 2025, reflecting deepening financial penetration and growing retail investor participation across India. The mutual fund segment is served by approximately 40–45 AMCs and spans a wide range of scheme categories including active equity, passive/index funds, debt, hybrid and solution-oriented products, catering to both retail and institutional investors across varied risk profiles and investment horizons.

The PMS segment provides customized investment solutions, i.e., discretionary, non-discretionary, and advisory, primarily targeting high net worth Individuals seeking tailored portfolio management outside the standardized mutual fund framework.

The AIF segment pools capital from sophisticated investors under three regulatory categories: Category I (infrastructure, venture capital, social venture), Category II (private equity, debt funds), and Category III (complex trading strategies) and has seen increasing adoption as investors seek differentiated return profiles.

Key structural growth drivers for the industry include increasing financialization of household savings, rising digital penetration enabling investor onboarding in smaller cities and towns, supportive regulatory frameworks promoting investor protection, and the continued expansion of distribution infrastructure. ## 8. Risk Factors

The following are the top 10 internal risk factors as disclosed in the DRHP:

1. **AUM-linked Revenue Dependency:** Our Company’s revenues and profitability are directly dependent on its QAAUM, and any decline in AUM, whether due to redemptions, market movements or scheme underperformance, would adversely impact financial results.
2. **Dependence on Capital Market Performance:** Our Company’s business is significantly exposed to the performance of Indian capital markets; adverse market conditions can reduce equity AUM values and trigger investor redemptions, impacting fee income.
3. **Underperformance Risk:** As at December 31, 2025, 11.36% of our equity and equity-oriented schemes, and 22.49% of our hybrid schemes, delivered top-quartile performance over three-year periods, while 28.05% of our equity and equity-oriented schemes, 35.80% of our hybrid schemes, and 5.78% of our debt schemes delivered top-quartile performance over five-year periods (*Source: CRISIL Report*). Underperformance of our Company’s schemes relative to benchmarks or peer AMCs could result in increased redemption, difficulty in attracting new investors, reputational harm, and a consequent adverse impact on AUM and revenues.
4. **Scheme Concentration Risk:** As at December 31, 2025, our top 5 schemes by mutual fund QAAUM accounted for 43.41% of our total mutual fund QAAUM, and our top 10 schemes by mutual fund QAAUM accounted for 59.95% of our mutual fund QAAUM.; any adverse developments affecting those schemes could have a disproportionate impact on overall financial performance.
5. **Liquidity Risk in Debt/Money Market Schemes:** Debt and money market schemes managed by our Company are exposed to liquidity risk; an inability to liquidate underlying assets at fair value during periods of market stress could adversely affect the Company's ability to meet redemption obligations, potentially triggering regulatory action and reputational damage.
6. **Regulatory and Compliance Risk:** Our Company operates under extensive oversight by SEBI and other regulators; changes in regulations, non-compliance, or adverse outcomes from regulatory inspections and observations could restrict business operations, result in penalties, and harm our Company’s reputation.
7. **Distributor Concentration and Relationship Risk:** Our Company relies significantly on its distribution network and relationships with key distributors for mobilising QAAUM; any deterioration in these relationships or loss of key distribution partners could adversely impact AUM growth.
8. **Fee Pressure: Regulatory and Competitive:** Our Company faces fee compression risk from both regulatory changes and competitive dynamics. Notably, SEBI’s revised expense structure, including the Base Expense Ratio framework and reduced fee caps effective April 1, 2026, is expected to adversely impact the fees the Company earns and overall profitability.
9. **Legal Proceedings:** Our Company and certain of our Promoters are involved in legal proceedings; adverse outcomes in such proceedings could result in financial liabilities, restrictions on operations, and reputational damage.
10. **Trademark / Intellectual Property Risk:** Our Company does not own the “SBI” trademark or logo, the use of which is central to its brand and market positioning. Any loss of, or inability to continue using, the “SBI” mark, including issues arising from unregistered logo use, could materially and adversely affect the Company's business, reputation and competitive positioning.

For further details of the risks applicable to us, see “*Risk Factors*” beginning on page 21. Investors are advised to read the risk factors carefully before making an investment decision in the Offer.
