RISK TO INVESTORS

For details, refer to the **"Risk Factors"** section on page 25 of the RHP.

1. Reliance on certain off-takers risk:

A significant portion of our revenue from operations is derived from the sale of electricity generated at our projects and our top two off-takers collectively contributed 86.06%, 91.11% and 97.00% of our revenue from operations for Fiscals 2026, 2025 and 2024, respectively. The loss of any such key commercial relationships could adversely affect our business, results of operations, financial condition and cash flows.

Particulars	Fiscal					
	2026		2025		2024	
	Amount (₹ million)	Percentage of revenue from operations (%)	Amount (₹ million)	Percentage of revenue from operations (%)	Amount (₹ million)	Percentage of revenue from operations (%)
Revenue generated from our off-taker - GUVNL	2,865.17	39.85	2,426.91	47.71	2,009.51	51.32
Revenue generated from our off-taker – MSEDCL	3,321.85	46.21	2,207.73	43.40	1,788.70	45.68
Total	6,187.02	86.06	4,634.64	91.11	3,798.21	97.00

2. High dependence on suppliers risk:

Our business is dependent on suppliers for the procurement of critical components, equipment, material and other goods for the operation of our projects as well as for other business operations. Our top 10 suppliers collectively contributed to 84.42%, 79.99% and 87.52% of our total purchases for Fiscals 2026, 2025 and 2024, respectively. Interruptions in the supply of our critical components and other goods could adversely affect our business operations, financial position and cash flow.

3. Encumbrance of Equity Shares risk:

Juniper Renewable Holdings Pte. Ltd. ("**Juniper Renewable**"), one of our Corporate Promoters, had pledged 7,194,462 Equity Shares (1.46% of total pre-Issue share capital on a fully diluted basis) in favour of IREDA as security for a loan availed by our Company. Additionally, post-listing, we are required to create a further pledge over certain Equity Shares in favour of IREDA as security in relation to one of our project financing arrangements. Any default under these pledge arrangements will entitle IREDA to enforce the pledge, which could dilute the shareholding of our Corporate Promoter and may adversely affect our business, results of operations, cash flows and prospects.

4. Geographical concentration risk:

Our renewable energy projects are located in the states of Gujarat, Maharashtra, Rajasthan and Madhya Pradesh. Our operations are susceptible to local and regional factors including adverse changes in government policies, political factors, economic conditions, weather conditions, natural disasters, the outbreak of infectious diseases and other unforeseen events and circumstances affecting these states. Any such events may disrupt our projects, adversely impact our ability to meet contractual obligations, and materially affect our operations, cash flows, financial condition and results of operations.

5. Land acquisition risk:

Our development of renewable energy projects may be restrained by our inability to identify or acquire suitable land sites. If we are unable to identify suitable land on commercially acceptable terms, our ability to develop new renewable energy projects on a timely basis or at all might be affected, which could result in the imposition of liquidated damages and/or reductions in tariffs which could adversely affect our business, financial condition, cash flows and results of operations.

6. Dependence on environmental conditions risk:

Our revenue is a direct function of the electricity we generate, which is significantly influenced by environmental conditions, irradiation and wind speed. Electricity output may decrease under adverse conditions including cloudy weather, sandstorms, heavy rainfall, solar eclipses and environmental pollution. The seasonal nature of our energy production can place additional demands on our working capital reserves, particularly during periods of reduced cash flow

from operations. Any adverse change in environmental conditions may materially impact our business, financial condition, cash flows and results of operations.

7. Related party transactions risk:

In the ordinary course of our business, we have in the past entered into, and may continue to enter into, related party transactions. While all such transactions have been conducted on an arm’s length basis in accordance with the Companies Act, relevant Accounting Standards and applicable regulations, we cannot assure you that we might not have achieved more favourable terms had such transactions not been entered into with related parties. The arithmetic aggregated absolute total of all related party transactions (excluding capital related transactions) amounted to ₹89.26 million (1.24% of revenue from operations) for Fiscal 2026, ₹56.99 million (1.13% of revenue from operations) for Fiscal 2025 and ₹60.59 million (1.54% of revenue from operations) for Fiscal 2024. There can be no assurance that such transactions, individually or in the aggregate, may not involve potential conflicts of interest which could have an adverse effect on our business, results of operations, cash flows and financial condition.

8. Change of regulatory policies and economic incentives risk:

Our business depends on a supportive policy and regulatory framework, including government incentives, renewable purchase obligations and favourable auction structures. Any reduction, modification or cancellation of such incentives or policy support could adversely impact the viability and profitability of our projects. We are also required to maintain numerous approvals, licences, registrations and permits, and any failure to obtain, renew or maintain these could interrupt our operations. Non-compliance with applicable environmental, health and safety laws could result in fines, curtailment of operations or criminal sanctions, and any changes in laws or regulations may require significant additional compliance expenditure, any of which could adversely affect our business, cash flows, financial condition and results of operations.

9. Lease termination and non-renewal risk:

We do not own a majority of the land on which our projects are located or will be located, and our Registered Office and Corporate Office are held on lease from third parties. If these leases or sub-leases are terminated or not renewed on terms acceptable to us, it could adversely affect our business, results of operations and cash flows.

10. Utilization of a portion of Net Proceeds for repayment of loan facilities from an affiliate of a Book Running Lead Manager:

A portion of our Net Proceeds may be used to repay or pre-pay certain loan facilities availed from The Hongkong and Shanghai Banking Corporation Limited. While HSBC Securities and Capital Markets (India) Private Limited is one of our Book Running Lead Managers and The Hongkong and Shanghai Banking Corporation Limited is an affiliate of our Book Running Lead Managers, these loans were sanctioned in the ordinary course of business and are not considered a conflict under applicable SEBI Regulations. The Board has chosen the loans and facilities to be repaid/prepaid based on commercial considerations. However, the use of Net Proceeds for repayment of such loans may still be perceived as a potential conflict of interest.

11. The price to earnings ratio based on diluted EPS for Financial Year 2026 is 257.83 and 271.08 times at the lower and upper end of the Price Band respectively.
12. The weighted average return on net-worth for Fiscals 2026, 2025 and 2024 is 1.34%.

- L. **Explanation for the Issue Price/Cap Price, being 6.36 times of weighted average cost of acquisition of primary issuances/secondary transactions of Equity Shares (as disclosed above) in view of the external factors which may have influenced the pricing of the Issue.**
1. India’s RE sector is set for significant expansion, supported by growing demand, favorable policies and innovative projects. According to the CRISIL Report, India’s peak power demand is expected to grow at an annual average CAGR of approximately 6.00-7.00% between Fiscal 2026 and Fiscal 2031, reaching 335.00-345.00 GW by Fiscal 2031. This increase is driven by persistent high temperatures, rising urbanization, economic growth and infrastructure development leading to higher power consumption.
2. To meet escalating demand, the CRISIL Report expects India’s installed power capacity to reach approximately 835.00-845.00 GW by Fiscal 2031 from its current capacity of 533.00 GW as at March 2026. This would require a new capacity addition of approximately 302.00-312.00 GW over the next five years. RE capacity (excluding large hydro) is expected to contribute approximately 260.00-275.00 GW to this net addition with RE expected to account for over 80.00% of the additional capacity between Fiscal 2026 and Fiscal 2031. RE capacity is thus estimated to account for about 52.00-57.00% of the installed capacity of 835.00-845.00 GW by Fiscal 2031.
3. India’s renewable energy vision also includes strengthening hybrid and firm power generation technologies. The introduction of WSH and FDRE solutions, which combine solar, wind and storage technologies, marks a turning point for grid stability and efficient resource utilization. As at March 31, 2026, WSH projects of an aggregate capacity of 18,998.86 MW are under construction in India. (Source: CRISIL Report)
