**(e) Other audit qualifications included in the Annexure to the auditors' report issued under Section 143(3)(i) of the Act on the audit of Internal Financial Controls which do not require any adjustments in the Restated Consolidated Summary Statements are as follows:**

**For the year ended 31 March 2025**

**Qualified Opinion**

According to the information and explanations given to us and based on the report issued by other auditors on internal financial controls with reference to consolidated financial statements in case of its subsidiaries, its associates and joint ventures, which are companies incorporated in India, the following material weaknesses have been identified in the operating effectiveness of the internal financial controls with reference to consolidated financial statements of as at 31 March 2025:

The Holding Company's internal financial controls in respect of timely management review of revision of estimated cost, margin, project value and project milestone completion, billing of construction and project contracts were not operating effectively which could potentially result in material misstatement in revenue, receivables and unbilled revenue.

A 'material weakness' is a deficiency, or a combination of deficiencies, in internal financial control with reference to consolidated financial statements, such that there is a reasonable possibility that a material misstatement of the Holding Company's annual or interim consolidated financial statements will not be prevented or detected on a timely basis.

In our opinion, except for the possible effects of the material weaknesses described above on the achievement of the objectives of the control criteria in respect of the companies included in the Group, its associates and joint ventures, which are companies incorporated in India, have, maintained in all material respects, adequate internal financial controls with reference to consolidated financial statements and such internal financial controls with reference to consolidated financial statements were operating effectively as at 31 March 2025, based on the internal control over financial reporting criteria established by the Holding Company considering the essential components of internal control stated in the Guidance Note issued by the ICAI.

**For the year ended 31 March 2024**

**Disclaimer of Opinion**

According to the information and explanation given to us, as at 31 March 2024, the Holding Company has not established and updated its internal financial controls with reference to consolidated financial statements on criteria based on or considering the essential components of internal control stated in the Guidance Note issued by the ICAI. Because of this reason, we are unable to obtain sufficient appropriate audit evidence to provide a basis for our opinion whether the Holding Company had adequate internal financial controls with reference to consolidated financial statements as at 31 March 2024 and whether such internal financial controls were operating effectively. Accordingly, we do not express an opinion on Internal Financial Controls with reference to consolidated financial statements.

We operate primarily as a principal, contracting directly with customers for the supply of manufactured goods and related services, while procuring such goods and services from third-party suppliers and, in certain cases, executing specific activities through our own facilities. We have two operating segments:

- **Manufacturing Business segment:** comprises design, manufacturing, supply and/or installation of custom-made goods focused on sectors of energy, precision components, capital goods and other ancillaries. This would include products sourced/ manufactured at third-party facilities and accounted in the books as procurement and sale of products. Additionally, this would also include projects with scope of design/ engineering and construction/ installation.

- *Ecosystem Business segment*: comprises the sale of industrial and other commodities used primarily as raw materials such as ferrous and non-ferrous metals and petrochemicals, including aluminium, zinc, steel, copper, lead and bitumen. During Fiscal 2024, this also included revenue from trading of apparel, textiles and other products; we exited this line of business in Fiscal 2024.

Following board resolutions dated January 23, 2026 and March 9, 2026, and a shareholders resolution dated March 26, 2026, we decided to discontinue our Civil Infrastructure Works segment, which undertook construction and other civil infrastructure projects such as water pipelines and railway tracks, and authorized the sale of its operations. The discontinuation of the Civil Infrastructure Works segment was made pursuant to our strategic realignment to focus on our core business segments.

The following table shows our segment revenue based on Ind AS 108 Operating Segments including as a percentage of revenue from operations – continuing operations for the Fiscals indicated

### ***Manufacturing Business***

#### *Customer orders*

We generate revenue in our Manufacturing Business through customer orders for manufactured products and related services. Customers place one-time, or multi-year orders with us for sourcing of products, in the form of purchase orders, master supply agreements or long-term arrangements, including multi-year take-or-pay contracts in certain cases.

Upon receipt and acceptance, customer orders are logged into our order book, which represents the aggregate value of confirmed but unexecuted orders as of a given date. Orders in the order book are executed over time, depending on product specifications, production schedules, logistics timelines and contractual milestones. Revenue is recognised as and when performance obligations under the relevant contracts are satisfied.

In the case of take-or-pay arrangements, customers commit to procuring a minimum value or volume of goods over a specified period. If the customer does not place orders up to the committed threshold within the stipulated time, they are contractually obligated to pay an agreed margin or shortfall amount. Such arrangements provide greater revenue visibility and reduce demand volatility, although actual revenue recognised remains linked to execution of goods and services or enforceable contractual payments.

#### *Execution of orders from suppliers*

Once an order is confirmed, we deploy our proprietary technology platform to match the order with suitable manufacturers from our panel of third-party suppliers based on factors such as capability, capacity, location, quality track record, and delivery timelines. Under this model:

- We procure manufactured goods from third-party suppliers on a principal-to-principal basis;
- We may split a single customer order across multiple suppliers where appropriate to optimise timelines or capacity utilisation;
- In certain cases, we also utilise our own facilities for assembly, finishing or specific manufacturing processes.

We take title to the goods procured from suppliers before supplying them to customers, and bear responsibility for quality assurance, delivery and contractual performance.

### ***Ecosystem Business***

Under our Ecosystem Business segment, which we operate under the brand Terra91, we facilitate the sourcing and supply of industrial raw materials and commodities to customers.

Under Terra91, our customers place purchase orders with us for sourcing of raw materials such as ferrous and non-ferrous metals and other industrial commodities used in manufacturing processes. We aggregate these purchase orders and buy the materials in bulk from our panel of suppliers and manufacturers, leveraging aggregated demand to optimise pricing, availability, and delivery timelines.

We act as a principal to customers, purchasing raw materials from suppliers and supplying them to customers. Revenue is recognised upon transfer of control of the materials to the customer and margins are derived from the spread between procurement costs and customer pricing, taking into account logistics, handling and related services.

While Terra91 originated as a sourcing solution to support suppliers in our Manufacturing Business, it has evolved into a standalone revenue segment serving third-party customers across multiple industries.

### ***Discontinued Operations***

We previously operated a Civil Infrastructure Works business, under which we undertook construction and other projects focused on civil infrastructure, mainly water pipelines and railway tracks. At meetings held on January 23, 2026 and March 9, 2026, our Board of Directors approved the sale of the operations of this business, and we have commenced actions required to effect such sale, which is expected to be completed in Fiscal 2027. Accordingly, the Civil Infrastructure Works business has been classified as a discontinued operation in accordance with Ind AS 105, “Non-current Assets Held for Sale and Discontinued Operations”, and is no longer disclosed as a separate operating segment in the Restated Consolidated Financial Information. In Fiscal 2026, we recognised exceptional items of discontinued operations of ₹4,530.00 million in discontinued operations in respect of an impairment loss, as the realisable value of the Civil Infrastructure Works business was expected to be lower than the net asset value of the business segment.

## **Principal Components of Results of Operations**

### ***Continuing operations***

#### *Income*

#### Revenue from operations

Our revenue from operations comprises (1) revenue from sale of products, (2) income from construction and project contracts, (3) sale of services and (4) other operating revenue.

#### Sale of products

Revenue from sale of products comprises revenue from:

- our Manufacturing Business segment that relates to the sale of custom-made goods focused on energy, precision components, capital goods and other ancillaries. This also includes revenue from sales of products manufactured by our suppliers.
- our Ecosystem Business segment that relates to the sale of industrial and other commodities used primarily as raw materials. During Fiscal 2024, this also included revenue from trading of apparel, textiles and other products; we exited this line of business in Fiscal 2024.

#### Income from construction and projects contracts

Income from construction and project contracts represents revenue from our Manufacturing Business segment wherein in addition to supply of manufacturing components, the scope also includes engineering/design, installation and/or commissioning of projects focussed on sectors such as energy and capital goods.

#### Sale of services

Revenue from sale of services comprises income derived from provision of job work services to customers on materials supplied by them and provision of business support and facilitation services.

#### Other operating revenue

Other operating revenue comprises revenue from export incentives and rental income.

### Other income

Our other income comprises interest income, income from sale of mutual funds, net gain on fair value changes on investments carried at fair value through profit and loss (“FVTPL”), net gain/(loss) on forward contracts, net loss/(gain) on foreign exchange transactions and translations, guarantee commission, profit on sale of property, plant and equipment and miscellaneous income.

### Expenses

Our expenses comprise “total cost of goods sold” (which we define as cost of materials consumed (including materials for construction and projects contracts), purchase of stock-in-trade and (increase)/decrease in inventories of finished goods, stock-in-trade and work-in-progress), employee benefits expense, finance costs, depreciation and amortization expenses and other expenses.

### Total cost of goods sold (Total COGS)

Total COGS is our largest expense.

- Cost of materials consumed (including materials for construction and projects contracts) comprises primarily the cost of raw materials consumed for manufacturing activities as well as construction and project contracts.
- Purchase of stock-in-trade comprises the cost of goods purchased from suppliers and resold to customers.
- (Increase)/decrease in inventories of finished goods, stock-in-trade and work-in-progress represents the change in inventories during a Fiscal.

The table below sets forth our Cost of materials consumed (including materials for construction and project contracts), Purchase of stock-in-trade, (Increase)/ decrease in inventories of finished goods, stock-in-trade and work-in-progress, Total COGS and total expense, including as a percentage of our total expenses, for the Fiscals indicated:

## Principal Factors Affecting our Financial Condition and Results of Operations

### *Maintaining and expanding our customer relationships*

Our ability to maintain and increase the breadth of our relationships with existing customers plays a critical role in the continued growth of our business. Through our existing and new customers, we continue to receive new orders in both our Manufacturing Business segment and Ecosystem Business segment, ranging from one-time spot orders to long-term multi-year contracts, which we then convert into revenue from operations. A portion of our customer relationships is supported by longer-term arrangements, including take-or-pay contracts in certain cases, which may provide increased visibility on potential order inflows over the contracted period.

Thus, our ability to maintain and grow our existing customer relationships is critical in continuing to receive new orders and increasing revenue visibility. This depends in part on transitioning customers from single-product sourcing to multi-category programmes. This in turn depends on achieving high customer satisfaction through our ability to deliver high quality products cost effectively while maintaining high on-time delivery percentages.

We have demonstrated a strong value proposition for our customer base, and this is evidenced in our strong customer metrics. As of March 31, 2026, our top 10 customers (based on their contribution to Revenue from Manufacturing Business) have been with us for an average of 2.8 years, out of the approximately eight years since we commenced operations. Our customer retention is reflected in our Fiscal 2023 to Fiscal 2026 median Manufacturing Business Net Revenue Retention (“NRR”) of 128.85% (NRR stood at 175.49% in Fiscal 2023, 137.46% in Fiscal 2024, 87.13% in Fiscal 2025 and 120.24% in Fiscal 2026), and Revenue from Repeat Customers in our Manufacturing Business was 78.11% in Fiscal 2024, 84.80% in Fiscal 2025 and 80.15% in Fiscal 2026. Our average order value increased from ₹45.94 million in Fiscal 2024 to ₹58.93 million in Fiscal 2025 and ₹91.74 million in Fiscal 2026.

Through our strong and growing customer relationships, we have been able to consistently receive more and larger new orders, and thus keep adding to our order book, giving us resilience in our revenue and growth.

In addition, we have diversified from our original focus on one-time, capex-related products to also serving original equipment manufacturers with recurring components linked to their ongoing opex budgets. This diversification has made our revenue more predictable, with revenue from Manufacturing Business – Energy Products, which comprises both capex-related products and recurring components, increasing at a CAGR of 25.08% from ₹41,596.61 million in Fiscal 2024 to ₹65,075.72 million in Fiscal 2026, and revenue from Manufacturing Business – Precision Products, which comprises wholly recurring components, increasing at a CAGR of 55.08% from ₹5,809.45 million in Fiscal 2024 to ₹13,971.87 million in Fiscal 2026. This growth was comparatively higher than the growth of revenue from our Manufacturing Business – Capital Goods, which is not recurring, and has increased at a CAGR of 5.49% from ₹13,160.38 million in Fiscal 2024 to ₹14,643.97 million in Fiscal 2026. As a result, our ability to continue to grow our opex-related products will be an important factor in our growth.

As a result, our ability to grow our business will depend on the performance of these product verticals. Demand from these product verticals is influenced by policy-led capital expenditure cycles, energy transition initiatives, localisation incentives, and supply-chain realignment trends, as well as the inherent cyclicity of manufacturing investment. Any slowdown, delay or change in such policies, capital expenditure cycles or procurement activity in these industries could adversely affect demand for our products and impact our results of operations.

### Economic conditions in the markets in which we operate

Our operations are dependent on the overall economic conditions in the markets in which we operate, including India, the USA, and Europe.

The following table sets forth our revenue from operations – continuing operations by geography based on Ind AS 108 Operating Segments in absolute amounts and as percentages of our revenue from operations – continuing operations for the Fiscals indicated:

As a result, our results of operations will depend on the strength of the economies in India, the USA, and other countries where we operate. Weakening economic conditions in our markets could cause demand for our products to decline, negatively affecting our revenue from operations and profitability. Our success will also be affected by government policies in and affecting our markets. For example, while this did not have a material impact on our business, financial condition, cash flows or results of operations, in Fiscal 2025, new USA tariffs on solar piles imported from India led to reduced orders due to uncertainty around the impact of such tariffs.

### Expanding our manufacturing capabilities

We operate a hybrid manufacturing model that integrates a global network of 6,979 third-party suppliers, complemented by our 26 facilities, as of March 31, 2026. Our own facilities primarily focus on assembly, subassembly, and finishing processes. We

selectively deploy owned capacity to improve execution control for large or complex programs, meet specific certification or regulatory requirements, or where customer arrangements justify proximity and dedicated oversight.

Third-party suppliers supply the majority of parts and components across our product categories. Our extensive third-party manufacturing base ranges from small and medium-sized enterprises to large, specialised plants. We will continue to onboard new suppliers to broaden our manufacturing capabilities and to enter into attractive industries and geographies ahead of demand upcycles, with a focus on adding suppliers with diverse manufacturing capabilities. We also intend to strategically expand our own manufacturing facilities to enhance execution control, gain access to certifications and policy incentives, secure the supply of critical products, and capture value unavailable through our supplier network. In addition to constructing our own facilities, we will pursue targeted acquisitions where the platform has a clear informational and operational advantage. While we will focus on acquisition targets that include long-standing marketplace suppliers with proven performance on delivery, quality, and capacity utilization and other third parties with an established presence and track record in their geographies and sector specializations, our ability to correctly evaluate the capabilities of targets and expected demand for their products will be an important factor in determining the success of such acquisitions. Our ability to identify suitable partners and successfully integrate them into our network will be key factors in this strategy and hence our results of operations.

#### ***Inherent operating leverage and cost-effectiveness of our platform***

Our ability to improve margins and profitability is affected not only by Gross Margins but also by our ability to manage our operating costs as our scale increases. While Total COGS constitutes a significant portion of our total expenses, employee benefits expense and other operating expenses represent meaningful components of our cost structure, and the extent to which such costs increase relative to revenue from operations can impact our operating leverage and results of operations.

Our integrated technology platform has exhibited in-built operating leverage by decoupling incremental volumes from proportional cost increases. This structural cost efficiency, achieved through automation and network scale, has contributed to the strengthening of our Manufacturing Business segment contribution margin.

Furthermore, we seek to manage the operating costs of our platform through (i) increased use of technology to standardise and govern processes across our manufacturing platform, (ii) upfront manufacturability analysis and design optimisation intended to reduce execution complexity and rework and improve turnaround time of suppliers, and (iii) improvements in sales efficiency. The effectiveness of these measures may vary by product category, customer requirements, execution complexity and market conditions. These measures are equally key for the continued improvement of our contribution margin profile and overall profitability.

Through our in-built operating leverage and our cost initiatives, we have been able to achieve contribution margin from our Manufacturing Business segment and at overall levels as set forth below.

Notes:

- (1) Represents figures from continuing operations.
- (2) Contribution Margin % is calculated as Contribution Margin divided by revenue from operations. Contribution Margin represents Gross Margin less directly attributable expenses namely, direct wages, subcontracting charges, freight charges, etc.
- (3) Manufacturing Business Contribution Margin % is calculated as Manufacturing Business Contribution Margin divided by revenue from Manufacturing Business. Manufacturing Business Contribution Margin represents gross margin less directly attributable expenses namely, direct wages, subcontracting charges, freight charges, etc. related to the Manufacturing Business.

Notes:

- (1) Guarantees represent the bank and corporate guarantees given to joint ventures and associate.
- (2) **Income tax related matters**
  - (i) Pursuant to income tax search conducted in earlier years, we received an Order u/s 143(3) of Income Tax Act, 1961, demanding ₹116.18 million (excluding interest and penalty) for AY 2021-22 disallowing certain expenses. We filed an appeal before the Commissioner of Income-tax (Appeals) against the assessment order and paid tax under protest of ₹23.24 million (March 31, 2025: ₹23.24 million and March 31, 2024: ₹23.24 million) which is now pending before CIT(A) for hearing. Further, while the appeal was pending disposal, refund amounting to ₹92.94 million (March 31, 2025: ₹92.94 million and March 31, 2024: Nil) for AY 2022-23 was adjusted against the demand of AY 2021-22. Thereafter, on 26 February 2026, we received a favorable order against the aforesaid appeal, and the majority of demand was squashed. The Order also included certain disallowance/additions which we believe that we have sufficient brought forward losses and unabsorbed depreciation available to set off the disallowance/additions determined in the order and no further outflow is expected. Subsequently, we have also received Order Giving Effect (“OGE”) dated 22 May 2026 and accordingly have also received refund of ₹139.77 million (including interest), being amount paid under protest/adjusted for AY 2021-22.
  - (ii) We had received an order u/s 147 of Income Tax Act, 1961 for AY 2020-21 disallowing certain expenses which resulted in reduction in the carry forward losses and a demand of ₹1.38 million (March 31, 2025: ₹1.38 million and March 31, 2024: Nil) was raised. Subsequently, the department adjusted a portion of the demand amounting to ₹0.77 million (March 31, 2025: ₹0.77 million and March 31, 2024: Nil) against the refund for AY 2022-23. Thereafter, on 28 April 2026, we received a favourable order from the Commissioner of Income-Tax (Appeals) wherein the majority of the demand was dropped and we are eligible for refund (along with interest) of the demand paid under protest/adjusted against the refund. We have also received certain transfer pricing adjustments by an order u/s 143(3) for AY 2022-23 which are adjusted against the brought forward business losses with no tax demand being raised therein. We have filed an appeal against the order which is pending disposal. Based on internal assessment, management is confident of favourable outcome and considering that this is a mere adjustment to losses, accordingly, no provision has been made in the Restated Consolidated Summary Statements.
  - (iii) Zet Town India Private Limited (“ZTIPL”) received an order u/s 143(3) of Income Tax Act, 1961 for AY 2023-24 disallowing certain expenses as well as short-term loans availed were treated as unexplained cash credits under section 68 of the Act, primarily due to non-receipt of confirmations from NBFC lenders in response to notices issued under section 133(6) and a demand of ₹99.65 million (March 31, 2025: Nil and March 31, 2024: Nil) was raised. ZTIPL has filed an appeal before the Commissioner of Income-tax (Appeals) subsequently and the matter is pending adjudication. Smile had preferred appeal against the said demand and it was pending for disposal with the CESTAT. The CESTAT allowed the appeal by Smile to the extent the demand related to the extended period. However, the Central Excise Authorities have filed an appeal before the Karnataka High Court

on this favourable ruling of the CESTAT. To the extent the demand related to the normal period of limitation, the CESTAT held that there cannot be a duty liability on Smile where the supplier of raw materials had cleared the goods either on payment of duty or under various exemptions as claimed by them. The CESTAT then remanded the case back to the adjudication officers for examining the above fact pattern. Smile has paid ₹36.46 million (March 31, 2025: ₹36.46 million and March 31, 2024: Nil) under protest. Smile has made necessary submissions before the High Court and the Adjudication authorities. ## Quantitative and Qualitative Disclosures about Market Risks

We are exposed to various financial risks. These risks are categorized into market risk, credit risk and liquidity risk. Our risk management is coordinated by the Board of Directors and focuses on securing long term and short term cash flows. We do not engage in trading of financial assets for speculative purposes.

### Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: interest rate risk, currency risk and other price risk, such as equity price risk and commodity risk. Financial instruments affected by market risk include borrowings and derivative financial instruments. We manage our market risk by diversifying our portfolio across various investments. We are exposed to interest rate risk since our working capital borrowings are in floating rate.

### Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. Our exposure to the risk of changes in foreign exchange rates relates primarily to our operating activities (when revenue or expense is denominated in a different currency from our functional currency).

The summary of quantitative data about our exposure to currency risk from non derivative financial instruments is as follows:

#### Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Our exposure to the risk of change in interest rate relates primarily to our borrowing or deposits which carries floating rate of interest. During the year we have borrowings which carry both fixed and floating interest rate and we do not have any exposure against the interest rate risk in the financial assets.

### Equity price risk

We are not an active investor in equity markets and do not hold any investment in equity for long term value accretion. Hence, we are not exposed to equity price risk.

### Commodity price risk

We are exposed to commodity price fluctuations, particularly in ferrous and non-ferrous products such as steel, aluminium, zinc, and copper. Price volatility in these raw materials can impact the cost of sales and profitability. To mitigate this risk, we engage in future contracts on commodity exchanges like MCX and LME. Regular reviews of market trends and strategic pricing decisions help manage the potential impact of these fluctuations on financial performance. The sensitivity analysis is provided below factoring the Mark to market gain or loss on the commodity future contracts taken by us.

### Credit risk

Credit risk is the risk that the counterparty will not meet its obligation under a financial instrument or customer contract, leading to financial loss. The credit risk arises principally from its operating activities (primarily trade receivables) and from its investing activities, including deposits with banks and financial institutions and other financial instruments.

Credit risk is controlled by analysing credit limits and creditworthiness of customers on a continuous basis to whom credit has been granted after obtaining necessary approvals for credit. The collection from the trade receivables are monitored on a continuous basis by our management.

### Trade receivables

We establish an allowance for impairment that represents our estimate of expected losses in respect of trade receivables based on the past and the recent collection trend. The maximum exposure to credit risk as at reporting date is primarily from trade receivables amounting to ₹29,242.13 million as of March 31, 2026 (March 31, 2025: ₹25,172.30 million and March 31, 2024: ₹28,133.49 million). #### Financial instruments and deposit

Credit risk on cash and cash equivalents and inter-company deposits is limited as the Holding Company generally transacts with banks with high credit ratings assigned by international and domestic credit rating agencies and its own subsidiaries. Investments of surplus funds, temporarily, are made only with approved counterparties, mainly mutual funds, who meet the minimum threshold requirements under the counterparty risk assessment process.

#### Liquidity risk

Liquidity risk is the risk that we will encounter difficulty in meeting the obligations associated with our financial liabilities that are settled by delivering cash or another financial asset. Our approach to managing liquidity is to ensure, as far as possible, that

we will have sufficient liquidity to meet our liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to our reputation. Also, we have unutilized credit limits with banks.

The table below summarizes the maturity profile of our financial liabilities:

## Critical Accounting Policies

### Basis of Consolidation

#### Subsidiaries

Subsidiaries are all entities over which the Group has control. Control exists when the parent has:

- Power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee)
- Exposure or rights, to variable returns from its involvement with the investee, and
- The ability to use its power over the investee to affect its returns

The group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or

disposed off during the year are included in the Restated Consolidated Summary Statement from the date the Group gains control until the date the Group ceases to control the subsidiary.

Restated Consolidated Summary Statements are prepared using uniform accounting policies for like transactions and other events in similar circumstances. If a member of the Group uses accounting policies other than those adopted in the Restated Consolidated Summary Statements for like transactions and events in similar circumstances, appropriate adjustments are made to that Group member's financial statements in preparing the Restated Consolidated Summary Statements to ensure conformity with the Group's accounting policies. The Restated Summary Statements of all entities used for the purpose of consolidation are same reporting date as that of the Holding Company i.e. year ended on 31 March.

When the end of the reporting period of the parent is different from that of a subsidiary, the subsidiary prepares, for consolidation purposes, additional financial information as of the same date as the financial statements of the parent, to enable the parent to consolidate the financial information of the subsidiary, unless it is impracticable to do so.

#### *Consolidation Procedure*

- Combine like items of assets, liabilities, equity, income, and expenses of the parent with those of its subsidiary. For this purpose, income and expenses of the subsidiary are based on the amounts of the assets and liabilities recognised in the consolidated financial statements at the acquisition date. Offset (eliminate) the carrying amount of the parent's investment in each subsidiary and the parent's portion of equity of each subsidiary.
- Offset (eliminate) the carrying amount of the parent's investment in each subsidiary and the parent's portion of equity of each subsidiary. Business combinations policy explains how to account for any related goodwill.
- Eliminate in full intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between entities of the group (profits or losses resulting from intragroup transactions that are recognised in assets, such as inventory and fixed assets, are eliminated in full). Intragroup losses may indicate an impairment that requires recognition in the consolidated financial statements. Ind AS 12 Income Taxes applies to temporary differences that arise from the elimination of profits and losses resulting from intragroup transactions.
- Profit or loss and each component of OCI are attributed to the equity holders of the parent of the Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. When necessary, adjustments are made to the financial statements of subsidiary to bring their accounting policies in line with the Holding Company's accounting policies. All intra-group assets, liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

A change in the ownership interest of a subsidiary, without loss of control, is accounted for as an equity transaction. If the Holding Company loses control over a subsidiary, it:

- Derecognises the assets (including goodwill) and liabilities of the subsidiary
- Derecognises the carrying amount of any non-controlling interests
- Derecognises the cumulative translation differences recorded in equity
- Recognises the fair value of the consideration received
- Recognises the fair value of any investment retained
- Recognises any surplus or deficit in profit or loss

Reclassifies the parent's share of components previously recognised in OCI to profit or loss or retained earnings, as appropriate, as would be required if the Group had directly disposed off the related assets or liabilities.

#### *Investments in joint ventures and associates*

Investments in associates and joint ventures are consolidated using equity method as per Ind AS 28 – 'Investment in Associates and Joint Ventures'. Under the equity method of accounting, the investments are initially recognised at cost and adjusted thereafter, post-acquisition attributable profit/(losses) are adjusted in the carrying value of investment upto the Group investment in the joint venture and associate.

If an entity's share of losses of an associate or a joint venture equal or exceeds its interest in the associate or joint venture (which includes any long-term interest that, in substance, form part of the Group's net investment in the associate or joint venture), the entity discontinues recognising its share of further losses. Additional losses are recognised only to the extent that the Group has

incurred legal or constructive obligations or made payments on behalf of the associate or joint venture. If the associate or joint venture subsequently reports profits, the entity resumes recognising its share of those profits only after its share of the profits equals the share of losses not recognised.

#### ***Non-current assets (or disposal group) held for sale and discontinued operations***

The Group classifies non-current assets and disposal groups as held for sale if their carrying amounts will be recovered principally through a sale rather than through continuing use and a sale is considered highly probable. The group treats sale of the asset or disposal group to be highly probable when:

- The appropriate level of management is committed to a plan to sell the asset (or disposal group),
- An active programme to locate a buyer and complete the plan has been initiated (if applicable),
- The asset (or disposal group) is being actively marketed for sale at a price that is reasonable in relation to its current fair value,
- The sale is expected to qualify for recognition as a completed sale within one year from the date of classification, and
- Actions required to complete the plan indicate that it is unlikely that significant changes to the plan will be made or that the plan will be withdrawn.

Non-current assets and disposal groups classified as held for sale are measured at the lower of their carrying amount and fair value less costs to sell. Costs to sell are the incremental costs directly attributable to the disposal of an asset (disposal group), excluding finance costs and income tax expense.

Property, plant and equipment and intangible are not depreciated, or amortised assets once classified as held for sale. Interest and other expenses attributable to liabilities of a disposal group classified as held for sale continue to be recognised.

Assets and liabilities classified as held for sale are presented separately from other items in the Restated Consolidated Summary Statement of Assets and Liabilities.

Discontinued operations are excluded from the results of continuing operations and are presented separately as ‘profit or loss before tax from discontinued operations,’ tax expense/(income) of discontinued operations,’ and ‘profit or loss after tax from discontinued operations,’ in the Restated Consolidated Summary Statement of Profit and Loss.

Additional disclosures are provided in Note 48. All other notes to the Restated Consolidated Summary Statements mainly include amounts for continuing operations, unless otherwise mentioned.

#### ***Investment properties***

Properties which is held for long-term rental yields or for capital appreciation or both, and that is not occupied by the Group, is classified as investment properties. Investment properties is measured initially at its cost, including related transaction costs. Subsequent to initial recognition, investment properties are stated at cost less accumulated depreciation and accumulated impairment loss, if any. Subsequent expenditure is capitalised to the asset’s carrying amount only when it is probable that future economic benefits associated with the expenditure will flow to the Group and the cost of the item can be measured reliably. Repairs and maintenance costs are expensed when incurred. Depreciation on investment properties is provided on a pro rata basis on straight line method over the estimated useful lives. Useful life of assets, as assessed by the Management, corresponds to those prescribed by Schedule II- Part ‘C’ of the Companies Act, 2013. Investment properties are derecognised either when they have been disposed of or when they are permanently withdrawn from use and no future economic benefit is expected from their disposal. The difference between the net disposal proceeds and the carrying amount of the asset is recognised in Statement of Profit and Loss in the period of derecognition. Though the Group measures investment properties using cost-based measurement, the fair value of investment properties are disclosed in the notes. Fair values are determined based on an annual evaluation performed by an accredited external independent valuer.

#### ***Current versus non-current classification***

We segregate assets and liabilities into current and non-current categories for presentation in the balance sheet after considering its normal operating cycle and other criteria set out in Ind AS 1, “Presentation of Financial Statements”. For this purpose, current assets and liabilities include the current portion of non-current assets and liabilities respectively. Deferred tax assets and liabilities are always classified as non-current.

The operating cycle is the time between the acquisition of assets for processing and their realization in cash and cash equivalents. We have identified period up to twelve months as its operating cycle.

### ***Business combination***

Acquisitions of businesses are accounted for using the acquisition method, other than those accounted for entities under common control. The consideration transferred in a business combination is measured at fair value, which is calculated as the sum of the acquisition-date fair values of the assets transferred by us, liabilities incurred by us to the former owners of the acquiree, the equity interests issued by us in exchange of control of the acquiree and fair value of any asset or liability resulting from a contingent consideration arrangement. Acquisition-related costs are generally recognised in the Consolidated Statement of Profit and Loss as incurred.

At the acquisition date, the identifiable assets acquired and the liabilities assumed are recognised at their fair value, except deferred tax assets or liabilities, and assets or liabilities related to employee benefit arrangements are recognised and measured in accordance with Ind AS 12 Income Taxes and Ind AS 19 Employee Benefits respectively.

Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree, and the fair value of the acquirer's previously held equity interest in the acquiree (if any) over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed.

If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the Group reports provisional amounts for the items for which the accounting is incomplete. Those provisional amounts are adjusted through goodwill during the measurement period, or additional assets or liabilities are recognised, to reflect new information obtained about facts and circumstances that existed at the acquisition date that, if known, would have affected the amounts recognized at that date. These adjustments are called as measurement period adjustments. The measurement period does not exceed one year from the acquisition date.

### ***Goodwill***

Goodwill arising on an acquisition of a business is carried at cost as established at the date of acquisition of the business less accumulated impairment losses, if any. Goodwill is not amortised but it is tested for impairment.

For the purposes of impairment testing, goodwill is allocated to each of our cash-generating units (or groups of cash-generating units) that is expected to benefit from the synergies of the combination.

A cash-generating unit to which goodwill has been allocated is tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash-generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro rata based on the carrying amount of each asset in the unit. Any impairment loss for goodwill is recognised directly in the Consolidated Statement of Profit and Loss. An impairment loss recognised for goodwill is not reversed in subsequent periods.

On disposal of the relevant cash-generating unit, the attributable amount of goodwill is included in the determination of the profit or loss on disposal.

### ***Property, plant and equipment***

Property, plant and equipment are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Such cost includes the cost of replacing part of the plant and equipment and borrowing costs for long-term construction projects if the recognition criteria are met. When significant parts of property, plant and equipment are required to be replaced at intervals, we depreciate them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognized in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognized in profit or loss as incurred.

Capital work in progress is stated at cost, net of accumulated impairment loss, if any.

We identify and determines cost of each component/ part of property, plant and equipment separately, if the component/ part has a cost which is significant to the total cost of the property, plant and equipment and has useful life that is materially different from that of the remaining asset.

Advances paid towards the acquisition of property, plant and equipment outstanding at each balance sheet date is classified as capital advances under other non-current assets and the cost of assets not ready to use before such date are disclosed under 'Capital work-in-progress'.

We depreciate property, plant and equipment over their estimated useful lives using the Straight Line Method. The management based on technical evaluation believes that these estimated useful lives are realistic and reflect fair approximation of the period over which the assets are likely to be used as follows:

| Asset                  | Useful lives estimated by the management    |
|------------------------|---------------------------------------------|
| Plant & Machinery      | 15 Years                                    |
| Building               | 18 - 60 Years                               |
| Computers              | 3 - 6 Years                                 |
| Furniture and fixtures | 10 Years                                    |
| Solar Photovoltaic     | 15 Years                                    |
| Leasehold improvements | Lease period or 5 years, whichever is lower |
| Office equipment       | 5 Years                                     |
| Vehicles               | 8-10 Years                                  |

Depreciation on addition to property plant and equipment is provided on pro-rata basis from the date of acquisition. Depreciation on sale/deduction from property plant and equipment is provided up to the date preceding the date of sale, deduction as the case may be. Gains and losses on disposals are determined by comparing proceeds with carrying amount. These are included in Statement of Profit and Loss under 'Other Income'.

Depreciation methods, useful lives and residual values are reviewed periodically at each financial year end and adjusted prospectively, as appropriate.

An item of property, plant and equipment and any significant part initially recognized is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the statement of profit and loss when the asset is derecognized.

### ***Foreign Currency Transactions***

#### *Functional and presentation currency*

Items included in the Restated Consolidated Summary Statements are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The Restated Consolidated Summary Statements are presented in Indian rupee (INR), which is the Holding Company's functional and presentation currency.

#### *Foreign currencies*

Transactions in foreign currencies are initially recorded by us using spot rates on the date the transaction first qualifies for recognition. However, for practical reasons, we use an average rate if the average approximates the actual rate at the date of the transaction.

Monetary assets and liabilities denominated in foreign currencies are translated into the relevant functional currency at exchange rates at the reporting date.

Exchange differences arising on settlement or translation of monetary items are recognized in the statement of profit and loss.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in OCI or profit or loss are also recognised in OCI or profit or loss, respectively).

#### *Foreign currency translation for group entities*

The results and financial position of all our entities that have a functional currency different from the presentation currency of the Holding Company are translated as follows:

- assets and liabilities for each balance sheet presented are translated at the closing rate at the date of that balance sheet;
- income and expenses for each statement of profit and loss are translated at monthly exchange rates, and
- all resulting exchange differences are recognised in other comprehensive income.

On disposal of a foreign operation, the associated exchange differences are reclassified to the statement of profit and loss, as part of the gain or loss on disposal.

Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated at the closing rate. Exchange differences arising are recognised in other comprehensive income.

### ***Fair value measurement***

We measure financial instruments at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability accessible to us.

The principal or the most advantageous market must be accessible by us.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

We use valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs. Our management determines the policies and procedures for fair value measurement such as derivative instrument.

All assets and liabilities for which fair value is measured or disclosed in the Restated Consolidated Summary Statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1: Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2: Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3: Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognised in the Restated Consolidated Summary Statements on a recurring basis, we determine whether transfers have occurred between Levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Fair-value related disclosures for financial instruments and non-financial assets that are measured at fair value or where fair values are disclosed, are summarised in the following notes:-

- Disclosure for fair valuation methods, significant estimates and judgements
- Financial Instruments (including those carried at amortised cost)

### ***Revenue Recognition***

Revenues are recognised when, or as, control of a promised goods or services transfers to customers, in an amount that reflects the consideration to which we expect to be entitled in exchange for transferring those goods or services. We have generally concluded that it is the principal in its revenue arrangements, because it typically controls the goods or services before transferring them to the customer.

For performance obligation satisfied over time, the revenue recognition is done by measuring the progress towards complete satisfaction of performance obligation. The progress is measured in terms of a proportion of actual cost incurred to-date, to the total estimated cost attributable to the performance obligation.

We transfer control of a good or service over time and therefore satisfies a performance obligation and recognises revenue over a period of time if one of the following criteria is met:

- (the customer simultaneously consumes the benefit of our performance or
- the customer controls the asset as it is being created/enhanced by our performance or

- there is no alternative use of the asset and we have either explicit or implicit right of payment considering legal precedents,

In all other cases, performance obligation is considered as satisfied at a point in time.

#### *Recognition of revenue from product*

Revenue from sale of products is recognized at the point in time when control of the asset is transferred to the customer, generally on delivery of product. We consider whether there are other promises in the contract that are separate performance obligations to which a portion of transaction price is to be allocated (e.g. liquidated damages, insurance etc.) In determining the transaction price of the product, we consider the effect of variable consideration, the existence of consideration payable to the customers, etc.

#### *Recognition of revenue from Construction and project related activity*

We enter into engineering, procurement and constructions contracts (EPC), revenue from such long term projects is recognized over time, using an input method with reference to the stage of completion of the contract activity at the end of the reporting period, measured based on the proportion of contract costs incurred for work performed to date relative to the estimated total contract costs.

We recognize revenue only when it can reasonably measure its progress in satisfying the performance obligation. Until such time, we recognize revenue to the extent of cost incurred, provided we expect to recover the costs incurred towards satisfying the performance obligation.

The stage of completion on a project is measured on the basis of proportion of the contract work based upon the contracts/ agreements entered into by us with its customers.

When it is probable that total contract costs will exceed total contract revenue, the expected loss is recognized as an expense immediately when such probability is determined. Liquidated damages / penalties are provided for as per the contract terms wherever there is a delayed delivery attributable to us.

Contract revenue earned in excess of billing has been reflected under “Other current assets” and billing in excess of contract revenue has been reflected under “Other current liabilities” in the balance sheet.

#### *Revenue from sale of services*

Revenue from services is recognised when the services are rendered in accordance with specific terms of the contract with customers.

Export incentives: Export incentives are recognised as income when the right to receive credit as per the terms of the scheme is established in respect of the exports made and where there is no significant uncertainty regarding the ultimate collection of the relevant export proceeds.

#### Contract balances

- **Contract assets:** We classify its right to consideration in exchange for deliverables as either a receivable or as unbilled revenue. A receivable is a right to consideration that is unconditional upon passage of time. Revenues in excess of billings is recorded as unbilled revenue and is classified as a financial asset where the right to consideration is unconditional upon passage of time. Unbilled revenue which is conditional is classified as other current asset. Trade receivables and unbilled revenue is presented net of impairment.
- **Contract liabilities:** A contract liability (which we referred to as Unearned Revenue) is the obligation to transfer goods or services to a customer for which we have received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before we transfer goods or services to the customer, a contract liability is recognised when the payment is received.
- **Trade receivables:** A receivable is recognised if an amount of consideration that is unconditional (i.e., only the passage of time is required before payment of the consideration is due). Refer to accounting policies of financial assets for guidance on recognition and measurement.

#### *Other income*

Interest Income is recognised on a basis of effective interest method as set out in Ind AS 109, Financial Instruments, and where no significant uncertainty as to measurability or collectability exists.

## ***Inventories***

Inventories are valued at the lower of cost and net realisable value.

Costs incurred in bringing each product to its present location and condition are accounted for as follows:

- Raw materials, packaging materials and stores and spare parts: Cost includes purchase price, (excluding those subsequently recoverable by the enterprise from the concerned revenue authorities), freight inwards and other expenditure incurred in bringing such inventories to their present location and condition. In determining the cost, weighted average cost method is used.
- Work in progress and manufactured finished goods: Cost of work in progress and manufactured finished goods is determined on the weighted average basis and comprises direct material, cost of conversion and other costs incurred in bringing these inventories to their present location and condition.
- Traded goods: Cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition. Cost of traded goods is determined on a weighted average basis.

Provision of obsolescence on inventories is considered on the basis of management's estimate based on demand and market of the inventories.

Net realizable value is the estimated selling price in the ordinary course of business, less the estimated cost of completion and the estimated costs necessary to make the sale.

The comparison of cost and net realizable value is made on item by item basis.

## ***Impairment of non-financial assets***

We assess, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, we estimate the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

We base our impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of our CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. For longer periods, a long-term growth rate is calculated and applied to project future cash flows after the fifth year. To estimate cash flow projections beyond periods covered by the most recent budgets/forecasts, we extrapolate cash flow projections in the budget using a steady or declining growth rate for subsequent years, unless an increasing rate can be justified. In any case, this growth rate does not exceed the long-term average growth rate for the products, industries, or country or countries in which the entity operates, or for the market in which the asset is used.

Impairment losses of continuing operations, including impairment on inventories, are recognised in the statement of profit and loss, except for properties previously revalued with the revaluation surplus taken to OCI. For such properties, the impairment is recognised in OCI up to the amount of any previous revaluation surplus.

For assets other than goodwill, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, we estimate the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of profit or loss unless the asset is carried at a revalued amount, in which case, the reversal is treated as a revaluation increase.

We assess whether climate risks, including physical risks and transition risks could have a significant impact. If so, these risks are included in the cash-flow forecasts in assessing value-in-use amounts.

### ***Contingent Liability***

Contingent liability is:

- a possible obligation arising from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity or
- a present obligation that arises from past events but is not recognized because;
  - it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation or
  - the amount of the obligation cannot be measured with sufficient reliability.

We do not recognize a contingent liability but disclose the same as per the requirements of Ind AS 37.

### ***Cash and cash equivalents***

Cash and cash equivalent in the balance sheet comprise cash at banks, cash on hand and short-term deposits net of bank overdraft with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the Restated Consolidated Summary Statement of Cash Flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of our cash management.

### ***Impairment of financial assets***

In accordance with Ind AS 109, Financial Instruments, we apply expected credit loss (ECL) model for measurement and recognition of impairment loss on financial assets that are measured at amortized cost and FVOCI.

**Trade receivables:** In respect of trade receivables, we apply the simplified approach of Ind AS 109, which requires measurement of loss allowance at an amount equal to lifetime expected credit losses. Lifetime expected credit losses are the expected credit losses that result from all possible default events over the expected life of a financial instrument.

**Other financial assets:** In respect of its other financial assets, we assess if the credit risk on those financial assets has increased significantly since initial recognition. If the credit risk has not increased significantly since initial recognition, we measure the loss allowance at an amount equal to 12-month expected credit losses, else at an amount equal to the lifetime expected credit losses.

ECL is the difference between all contractual cash flows that are due to us in accordance with the contract and all the cash flows that the entity expects to receive (i.e. all shortfalls), discounted at the original EIR. When estimating the cash flows, an entity is required to consider all contractual terms of the financial instrument (including prepayment, extension etc.) over the expected life of the financial instrument. However, in rare cases when the expected life of the financial instrument cannot be estimated reliably, then the entity is required to use the remaining contractual term of the financial instrument.

ECL impairment loss allowance (or reversal) recognized during the year is recognized as income/expense in the statement of profit and loss. In balance sheet ECL for financial assets measured at amortized cost is presented as an allowance, i.e. as an integral part of the measurement of those assets in the balance sheet. The allowance reduces the net carrying amount. Until the asset meets write off criteria, we do not reduce impairment allowance from the gross carrying amount.

### ***Convertible preference shares***

Convertible preference shares are separated into liability and equity components based on the terms of the contract. On issuance of the convertible preference shares, the fair value of the liability portion of an optionally convertible preference shares is determined using a market interest rate for an equivalent non-convertible bond. This amount is recorded as a liability on an amortised cost basis until extinguished on conversion or redemption of the bonds. The remainder of the proceeds is attributable to the equity portion of the compound instrument since it meets Ind AS 32, Financial Instruments: Presentation, criteria for fixed-to-fixed classification. Transaction costs are deducted from equity, net of associated income tax. The carrying amount of the conversion option is not subsequently re-measured.

Transaction costs are apportioned between the liability and equity components of the convertible preference shares based on the allocation of proceeds to the liability and equity components when the instruments are initially recognized.

### ***Acceptances***

Acceptances represents amount payable towards arrangements wherein banks and financial institutions make direct payments to our suppliers for materials and services. The banks and financial institutions are subsequently repaid by us as per the arrangement with banks and financial institution. For the purposes of cash flow presentation, the economic substance of these transactions is determined to be operating in nature, and accordingly, settlement of such trade acceptances by us is treated as cash flows from operating activity

### ***Earnings per share***

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders (after deducting preference dividends and attributable taxes) by the weighted average number of equity shares outstanding during the period. Partly paid equity shares are treated as a fraction of an equity share to the extent that they are entitled to participate in dividends relative to a fully paid equity share during the reporting period. The weighted average number of equity shares outstanding during the period is adjusted for events such as bonus issue, bonus element in a rights issue, share split, and reverse share split (consolidation of shares) that have changed the number of equity shares outstanding, without a corresponding change in resources.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

### ***Segment reporting***

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker. The Chief Executive Officer (“CEO”) of the Holding Company has been identified as the chief operating decision maker.

We identify primary segments based on the dominant source, nature of risks and returns and the internal organization and management structure. The operating segments are the segments for which separate financial information is available and for which operating profit/loss amounts are evaluated regularly by the chief operating decision maker in deciding how to allocate resources and in assessing performance, the analysis of geographical segments is based on the areas in which our major operating divisions operate.

### ***Exceptional items***

Exceptional items are disclosed separately in the Restated Consolidated Summary Statements where it is necessary to do so to provide further understanding of our financial performance. These are material items of income or expense that have to be shown separately due to their nature or incidence.

The complaint, first amended on February 2, 2026 and then again on March 11, 2026, alleged claims for theft of trade secrets, trademark infringement, false advertising, and various other state-law claims ("**California Complaint**"), which Zetwerk then moved to dismiss. On June 23, 2026, before a scheduled hearing on Zetwerk's motion to dismiss, Ayr, Edla, and Stuckey voluntarily dismissed the California Complaint, which ended the California District Court action.

After the voluntary dismissal of the California Complaint, Ayr brought a Counterclaim in the Texas Business Court action ("**Texas Counterclaim**"). The Texas Counterclaim alleges that Ayr's damages are at least \$1,000 million, which is equivalent to ₹ 95,310.00 million (calculated basis an exchange rate of 1 US \$ = ₹95.31 as at July 10, 2026). The Texas Business Court action remains pending, and the parties are currently engaged in discovery. Zetwerk continues vigorously to press its claims and defend against Ayr's Counterclaim.

Further, on July 16, 2026, Ayr filed a complaint under section 337 of the Tariff Act of 1930 ("**ITC Complaint**") before the United States International Trade Commission in Washington, D.C. ("**US ITC**") against Plaintiffs and KRYFS Power Components, another of our Subsidiaries, based on the same factual allegations as the California Complaint and Texas Counterclaim. The ITC Complaint seeks to exclude Zetwerk and its affiliates from exporting to the United States transformer products related to Ayr's allegations of theft of trade secrets, trademark infringement, and false advertising. The ITC has not yet decided whether to institute an investigation and has not made any determination regarding the merits of Ayr's allegations. Zetwerk disputes Ayr's allegations, which substantially parallel those Ayr has made in the California Complaint and Texas Counterclaim.

### **Phased implementation of Unified Payments Interface**

SEBI has issued the UPI Circulars in relation to streamlining the process of public issue of inter alia, equity shares. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by RIBs through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and

smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

**Phase I:** This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended until June 30, 2019. Under this phase, a RIB had the option to submit the ASBA Form with any of the Designated Intermediary and use his/ her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

**Phase II:** This phase was applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had decided to extend the timeline for implementation of UPI Phase II until March 31, 2020. Subsequently, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 had extended the timeline for implementation of UPI Phase II until further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds has been discontinued and replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continued to be six Working Days during this phase.

**Phase III:** This phase had become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 (“T+3 Notification”). In this phase, the time duration from public issue closure to listing has been reduced to three Working Days.

The Offer will be made under UPI Phase III of the UPI Circular (on mandatory basis). The Offer will be advertised in all editions of Financial Express, an English national daily newspaper, all editions of Jansatta, a Hindi national daily newspaper and in all editions of Vishwavani, a Kannada daily newspaper (Kannada being the regional language of Karnataka, where our Registered and Corporate Office is located) each with wide circulation on or prior to the Bid/Offer Opening Date and such advertisement shall also be made available to the Stock Exchanges for the purpose of uploading on their websites.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using UPI. Our Company will be required to appoint SCSBs as the Sponsor Bank(s) to act as conduits between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the UPI Bidders.

Individual investors bidding under the Non-Institutional Portion bidding for more than ₹200,000 and up to ₹500,000 using the UPI Mechanism, shall provide their UPI ID in the Bid-cum-Application Form for Bidding through Syndicate, sub-syndicate members, Registered Brokers, RTAs or CDPs, or online using the facility of linked online trading, demat and bank account (3 in 1 type accounts), provided by certain brokers.

Pursuant to the UPI Circulars, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circulars include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law.

## RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the GoI and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Foreign investment is permitted (excepted in the prohibited sectors) in Indian companies, either through the automatic route or the approval route, depending upon the sector in which foreign investment is sought to be made. The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment.

The Government has from time to time made policy pronouncements on foreign direct investment (“**FDI**”) through press notes and press releases. The DPIIT, issued the Consolidated FDI Policy, which, with effect from October 15, 2020, consolidated and superseded all previous press notes, press releases, circulars and clarifications on FDI issued by the DPIIT that were in force and effect as on October 15, 2020. The Consolidated FDI Policy will be valid until the DPIIT issues an updated circular. Currently, foreign direct investment in the manufacturing sector is up to 100% under the automatic route. For further details, see “*Key Regulations and Policies*” on page 330.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the FDI Policy and transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/ RBI.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT, as amended by Press Note No. 2 (2026 Series) dated March 15, 2026, and the FEMA Rules, any investment, subscription, purchase or sale of equity instruments by an entity or a citizen a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“**Restricted Investors**”), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Pursuant to the FEMA Rules, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank or fund in India. Each Bidder should seek independent legal advice about its ability to participate in the Offer. In the event such prior approval of the GoI is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar to the Offer in writing about such approval along with a copy thereof within the Offer Period.

As per the existing policy of the Government of India, OCBs cannot participate in the Offer. For further details, see “*Offer Procedure*” on page 628.

In terms of the FEMA Rules, for calculating the aggregate holding of FPIs in a company, holding of all registered FPIs shall be included. The aggregate limit for FPI investments shall be the sectoral cap applicable to our Company. In accordance with the FEMA Rules, the total holding by any individual person resident outside India (including NRI and OCI), on a repatriation basis, shall not exceed 10% of the total paid-up equity capital on a fully diluted basis or shall not exceed 10% of the paid-up value of each series of debentures or preference shares or share warrants issued by an Indian company and the total holdings of all individual persons resident outside India (including NRIs and OCIs) put together shall not exceed 24% of the total paid-up equity capital on a fully diluted basis or shall not exceed 24% of the paid-up value of each series of debentures or preference shares or share warrant.

Accordingly, the Equity Shares are being offered and sold (i) within the United States only to persons reasonably believed to be “qualified institutional buyers” (as defined in Rule 144A under the U.S. Securities Act and referred to in this Updated Draft Red Herring Prospectus - I as “U.S. QIBs”, for the avoidance of doubt, the term U.S. QIBs does not refer to a category of institutional investor defined under applicable Indian regulations and referred to in this Updated Draft Red Herring Prospectus - I as “QIBs”) in transactions exempt from, or not subject to, the registration requirements of the U.S. Securities Act, and (ii) outside the United States in “offshore transactions” as defined in and in compliance with Regulation S under the U.S. Securities Act and the applicable laws of the jurisdictions where those offers and sales are made.
